OBJECTIVE

Driven Computer Science and Engineering student with nearly five years of programming experience, specializing in AI-assisted development, prompt engineering, and full-stack web technologies. Proven track record in research and practical applications, seeking to leverage technical and analytical skills to solve real-world problems in an innovative software engineering environment.

EDUCATION

B.Tech in Computer Science and Engineering (Lateral Entry)

2023 – 2026

Raja Balwant Singh Engineering Technical Campus, Agra, UP

SGPA (5th Sem): 7.87

– Minor Degree in Robotics

Diploma in Computer Science and Engineering

2020 – 2023

Raja Balwant Singh Polytechnic, Agra, UP

Grade: 76.5% (First Division)

TECHNICAL SKILLS

Languages: Python, Java, JavaScript (ES6+), TypeScript, C, SQL

Web Technologies: HTML5, CSS3, React.js, Next.js, Node.js, Express.js, Bootstrap, Tailwind, GSAP.js

AI & Specialized Tools: Prompt Engineering, GitHub Copilot, ChatGPT, Claude AI, NLP, LLM Integration

Databases & DevOps: MySQL, PostgreSQL, MongoDB, Git, GitHub, Docker, Linux

EXPERIENCE

Research Intern

July 2025 – August 2025

Defence Institute of Bio Energy Research (DRDO DIBER), Haldwani

– Engineered custom multi-utility calculators grounded in real physics and dataset parameters for Grade E scientists.

– Received an official “Appreciation of Work” certificate for outstanding contributions to ongoing research projects.

Software Intern

June 2022 – August 2022

Arcane Programming InfoTech, Lucknow

– Developed foundational skills in web programming and software engineering workflows.

– Recognized as “Student of the Batch” for exceptional performance and rapid skill acquisition.

PROJECTS

Real-Time Sign Language Recognition System

– Developed an SLR agent leveraging a MobileNetV2 feature extractor and Bidirectional LSTM classifier for ASL alphabet recognition.

– Achieved 98.2% accuracy and 35 FPS processing speed.

Custom AI Chatbot (Gemini API)

– Built a web API to streamline task assignment and job tracking, integrating advanced LLM capabilities for natural language understanding.

Jungle Safari Animated Interface

– Designed an interactive, frontend-only web application utilizing GSAP.js, HTML, and CSS to deliver high-performance, complex UI animations.

PUBLICATIONS & ACHIEVEMENTS

Research Publication: Authored and submitted “Real-Time Sign Language Recognition System for Enhanced Communication” to the IMPACT2026 conference and G.L. Bajaj Group of Institutions.

Coding Platforms: Achieved a Gold Badge in Python on HackerRank and successfully resolved over 100 Python algorithmic challenges on LeetCode.
